DETAILED ACTION

Allowable Subject Matter

Claims 1-6, 8-10, and 13-18 are allowed.

The following is an examiner's statement of reasons for allowance: prior art does not teach nor render obvious an amplifier circuit that has, in combination with other limitations, an input and an output of the resistor network are the input node of the first stage and the output node of the last stage of the resistor network, respectively; wherein a current of the input of the resistor network is larger than that of the output of the resistor network such that the amplifier circuit has a large-resistance capacitive time constant; nor does it have the second resistor network comprises a plurality of second stages connected serially; wherein each second stage of the second resistor network comprises a second input node, a second output node, a third resistor coupled between the second input node and the common node, and a fourth resistor coupled between the second input node and the second output node; nor does it have an input and an output of the resistor network are the input node of the first stage and the output node of the last stage of the resistor network, respectively; wherein a current of the input of the resistor network is larger than that of the output of the resistor network such that the resistor network is operated as a large-resistance resistor.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Patricia T. Nguyen whose telephone number is (571) 272-1768. The examiner can normally be reached on 6:30 AM - 5:00 PM.
